→ Benutzerprofil öffnen (  unten links)

→ Zugänge & Kartenleser

1. Rechtsklick Bestehender NetKey Zugang bearbeiten

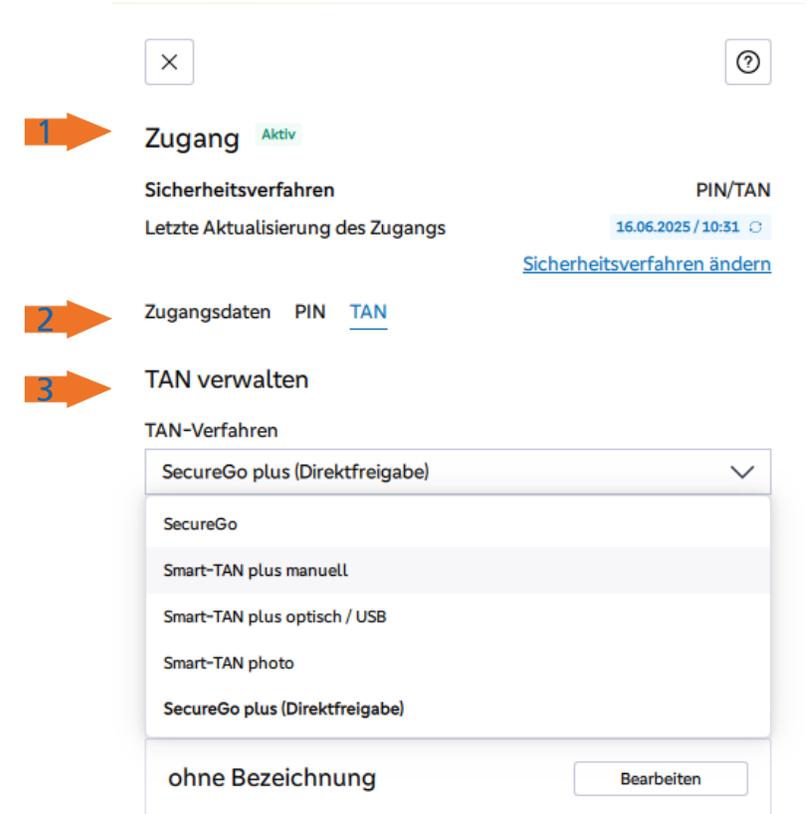

2. TAN

3. TAN verwalten

Verfahren auswählen

→ bestätigen

→ Schließen

The screenshot shows a web interface for managing access. At the top right, there are close (X) and help (?) icons. The main content area displays a card for an active access ('Zugang Aktiv').

- 1** (orange arrow) points to the 'Zugang Aktiv' header.
- The card shows 'Sicherheitsverfahren' (Security procedure) and 'PIN/TAN'.
- Below this, it states 'Letzte Aktualisierung des Zugangs' (Last update of access) with the date '16.06.2025 / 10:31' and a refresh icon.
- A link 'Sicherheitsverfahren ändern' (Change security procedure) is visible.
- 2** (orange arrow) points to the 'Zugangsdaten' (Access data) section, where 'PIN' and 'TAN' are listed.
- 3** (orange arrow) points to the 'TAN verwalten' (Manage TAN) section.
- Under 'TAN-Verfahren' (TAN procedure), a dropdown menu is open, showing options: 'SecureGo plus (Direktfreigabe)', 'SecureGo', 'Smart-TAN plus manuell', 'Smart-TAN plus optisch / USB', 'Smart-TAN photo', and 'SecureGo plus (Direktfreigabe)'. The first option is currently selected.
- At the bottom of the dropdown, there is a 'ohne Bezeichnung' (without designation) option and a 'Bearbeiten' (Edit) button.
